Java Full Stack Developer | 2+ Years of Professional Experience

PROFESSIONAL SUMMARY

Results-driven Java Full Stack Developer with 2+ years of hands-on experience building enterprise-grade web applications and ERP integrations at SutiSoft Inc. Expertise spans full-stack development using Java 21/25, Spring Boot (Microservices), React TypeScript, and PostgreSQL. Experienced in migrating legacy monolithic JSP/Spring MVC applications to modern microservices architecture. Currently contributing to SutiERP and SutiBooks — integrating all SutiSoft product suite (SutiAP, SutiAR, SutiIMS, SutiExpense, SutiProcure, SutiAMS) and third-party platforms (QuickBooks Online, Sage Intacct, NetSuite) via OAuth2-based SutiAPI. Adept at delivering secure, scalable backend services with JWT authentication in Agile/Scrum environments.

TECHNICAL SKILLS

Languages: Java 21 (SutiERP), Java 25 (SutiBooks), TypeScript, JavaScript (ES6+), SQL, PL/SQL, HTML5, CSS3

Backend Frameworks: Spring Boot, Spring MVC, Spring Cloud, Spring Microservices, Hibernate (ORM), JDBC, Servlets, JSP

Frontend Technologies: React (TypeScript), Bootstrap 5, RESTful APIs

Databases: PostgreSQL, Oracle, MySQL, RDBMS

Security & Authentication: JWT (JSON Web Tokens), OAuth2

ERP & Third-Party Integration: SutiAPI, QuickBooks Online API, Sage Intacct API, NetSuite API, SutiAP, SutiAR, SutiIMS, SutiExpense, SutiProcure, SutiAMS

Architecture: Microservices Architecture, Monolithic to Microservices Migration, RESTful API Design

DevOps & Tools: Git, GitLab, Maven, Gradle, Postman, JUnit, Mockito

Methodologies: Agile/Scrum, SDLC, Test-Driven Development (TDD)

PROFESSIONAL EXPERIENCE

SutiSoft Inc. | Hyderabad, India

Jan 2026 – Present

Java Backend Developer — SutiERP & SutiBooks

Tech Stack: Java 21 (SutiERP) | Java 25 (SutiBooks) | Spring Boot | Microservices | React TypeScript | PostgreSQL | JWT | OAuth2 | SutiAPI | RESTful APIs | GitLab

- **SutiERP — Enterprise Integration Hub:** Developing the core SutiERP platform that serves as a central integration layer, connecting all SutiSoft products including SutiAP (Accounts Payable), SutiAR (Accounts Receivable), SutiIMS (Inventory), SutiProcure, SutiExpense, and SutiAMS into a unified enterprise ecosystem.
- **SutiBooks — Cloud Accounting Platform:** Building and enhancing accounting and bookkeeping modules for SutiBooks using Java 25 and Spring Boot, with PostgreSQL as the primary database and React TypeScript for the frontend.
- **Microservices Architecture:** Designing and implementing independently deployable microservices using Spring Cloud, enabling high scalability, fault isolation, and modular deployments across all SutiSoft platforms.
- **JWT & OAuth2 Security:** Implementing JWT-based authentication for internal service communication and OAuth2 via SutiAPI for secure bi-directional integration with external ERP platforms (NetSuite, Sage Intacct, QuickBooks Online).
- **API Design & Integration:** Designing RESTful APIs enabling seamless cross-platform data exchange with strict data integrity, high availability, and support for real-time synchronization across enterprise financial systems.

Junior Software Developer — SutiAP & SutiAPI

Tech Stack: Java | Spring Boot | Microservices | React TypeScript | PostgreSQL | JWT | OAuth2 (SutiAPI) | QuickBooks Online API | Sage Intacct API | NetSuite API | GitLab | Postman

- **Third-Party ERP Integrations (SutiAPI):** Architected and implemented microservices-based integrations for QuickBooks Online, Sage Intacct, and NetSuite using OAuth2 via SutiAPI, enabling seamless bi-directional financial data sync with SutiAP.
- **SutiAP Feature Development:** Owned end-to-end implementation of critical client requirements in SutiAP (Accounts Payable Automation), developing responsive React TypeScript UI components and securing sensitive financial data flows.
- **Performance Optimization:** Optimized data exchange workflows and API response times between SutiAP and external financial systems, improving synchronization reliability and system throughput.
- **Agile Collaboration:** Delivered high-priority features within tight sprint deadlines, collaborating with cross-functional product, QA, and DevOps teams in a fast-paced Agile/Scrum environment.

Software Developer Trainee — SutiAP (Monolithic)

Tech Stack: Java | Spring MVC | JSP | Hibernate | Oracle/MySQL | SQL/PL/SQL | Bootstrap | Git | Postman

- Contributed to SutiAP, a monolithic Spring MVC + JSP application for Accounts Payable Automation, focusing on invoice-to-pay cycle automation.
- Developed and enhanced JSP-based front-end views and Spring MVC controllers for AP workflows, improving user experience and process efficiency.
- Wrote optimized SQL and PL/SQL queries, stored procedures, and triggers in Oracle/MySQL for financial data retrieval and reporting.
- Performed debugging, unit testing (JUnit), and code reviews to improve application stability and code quality.

KEY ACHIEVEMENTS

- Contributed to migrating SutiAP from a legacy monolithic JSP/Spring MVC application to a modern Microservices architecture with React TypeScript frontend.
- Integrated 3 major third-party ERP platforms — QuickBooks Online, Sage Intacct, and NetSuite — using OAuth2 via SutiAPI, enabling real-time financial data synchronization.
- Currently developing SutiERP — a central integration platform unifying 6+ SutiSoft products (SutiAP, SutiAR, SutiIMS, SutiProcure, SutiExpense, SutiAMS).
- Achieved 90%+ code coverage through Test-Driven Development (TDD) using JUnit and Mockito, significantly reducing production defects.
- Delivered all sprint commitments on time across multiple product lines in a high-velocity Agile team at SutiSoft.

EDUCATION

Master of Computer Applications (MCA) — Siddharth Institute of Engineering & Technology, Puttur2021 – 2023 | 87.5%
Bachelor of Science (B.Sc. Computers) — Himaja Degree College, Puttur2018 – 2021 | 81%
Intermediate (MPC) — Himaja Junior College, Puttur2016 – 2018 | 86.5%
SSC (10th Grade) — Z.P. High School, T.K.M. Peta2016 | 83%
